

Introduction

GRAPH-IT

Company Details

Founded and Managing by Mr. Roberto Attuati (Totally over 40 years experience in the different fields of graphite products).

Company headquarters and warehouse in Milan Italy.

Serving the graphite based products of Osaka Gas Chemicals produced in Japan.

Other supportive products (such as coatings and special ceramics) and services (machining or customization) are available for the customers.

All the items in Milan warehouse are European Community customs cleared and available from stock for quick delivery.

Products Portfolio

- Carbon fiber reinforced carbon matrix composites (named as C/C or CFC).
- Graphite insulation boards (rigid felts and soft felts).
- Graphite foil items (reflection and heat shield).
- Other supportive materials (Special ceramics, molybdenum, etc.).
- Graphite parts and machined items.

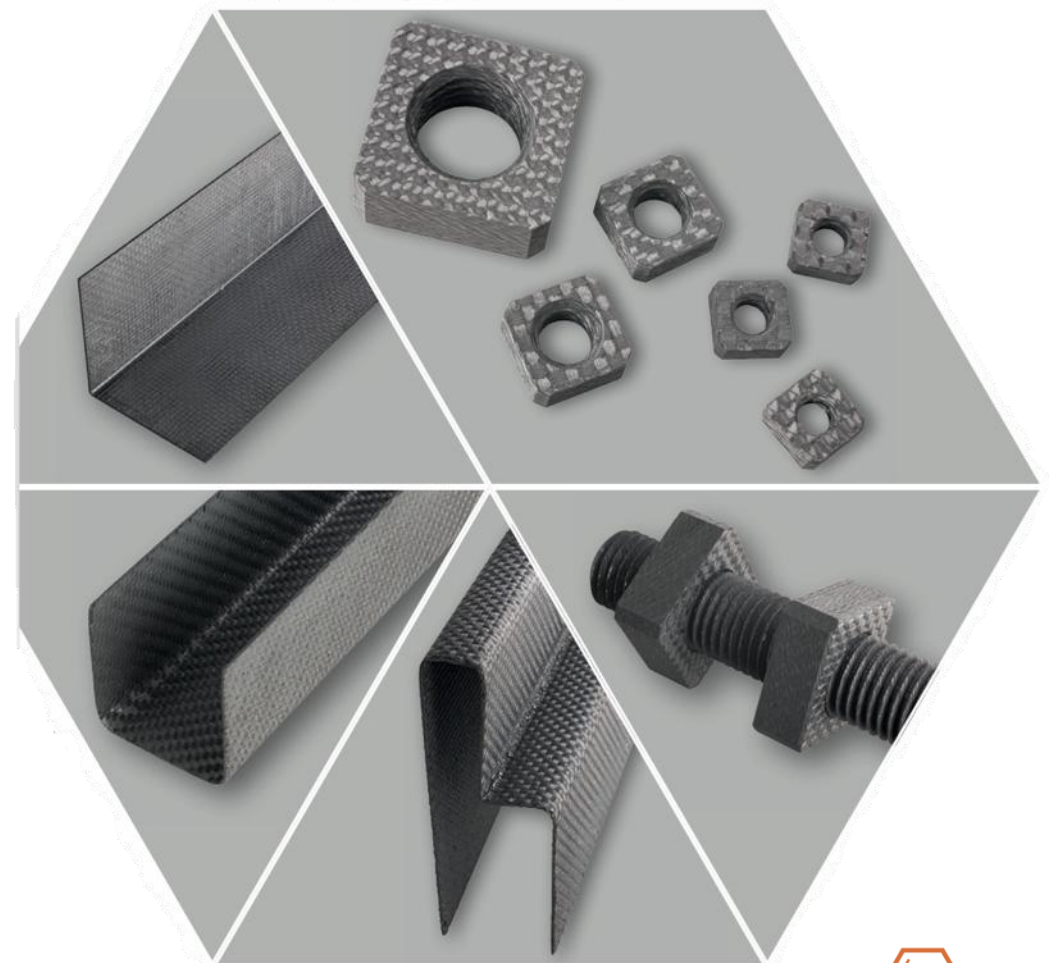

Warehouse in Milan Italy

CC Composite for High Thermal Applications

Featured Shapes:

- Standard size plates and cut to sizes upon request
- Profiles as: U-profile, L-profile, H-profile
- Screws, nuts, bolts
- Convection fan tubes and blades
- Charging trays and grids
- Machined parts: i.e. heating elements. gas diffusion plates etc.

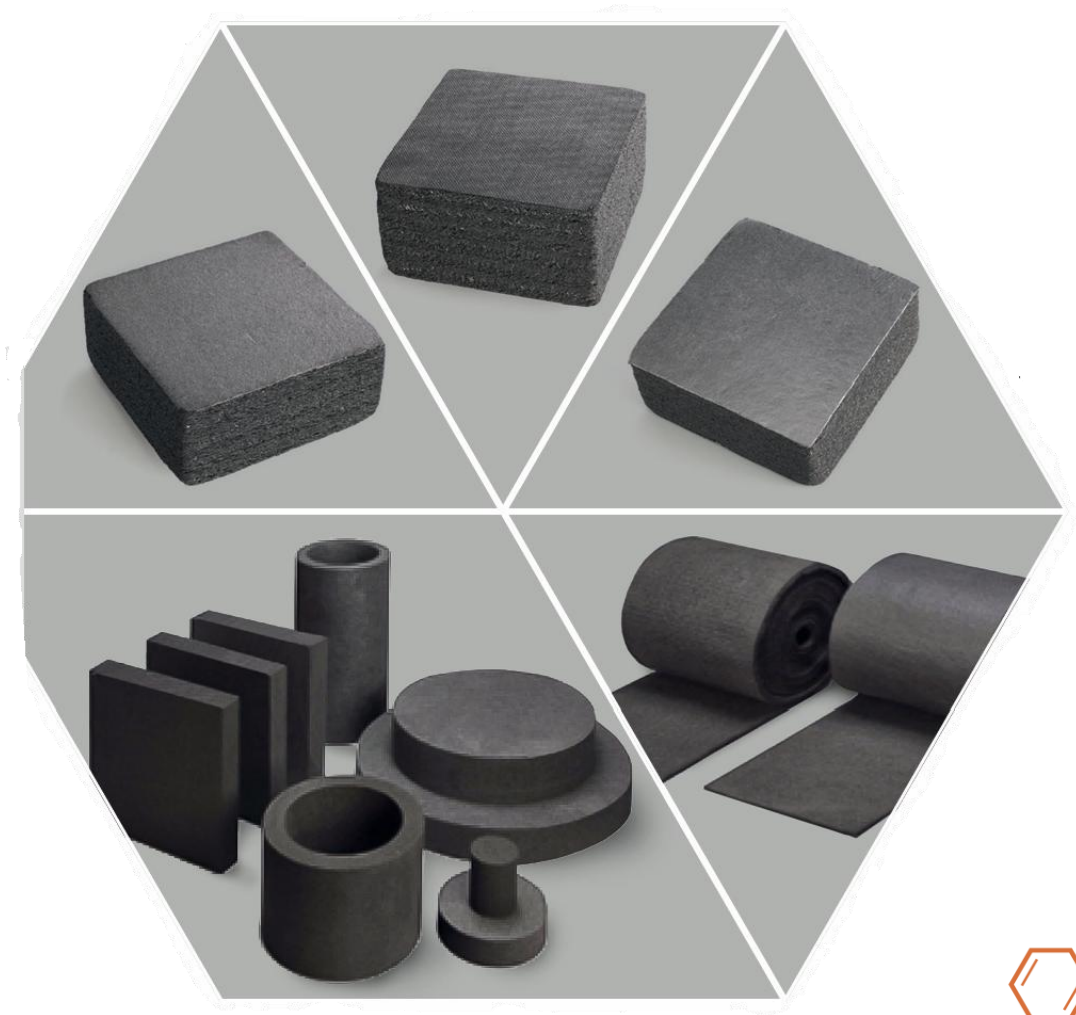

Graphite Insulation for High Temperature

Rigid Felts (PAN based):

- Flat Plates
- Machined Round Plates
- Shaped parts (cylinder, tubes, etc.)
- Special coated, foil on surface etc.

Soft Felts:

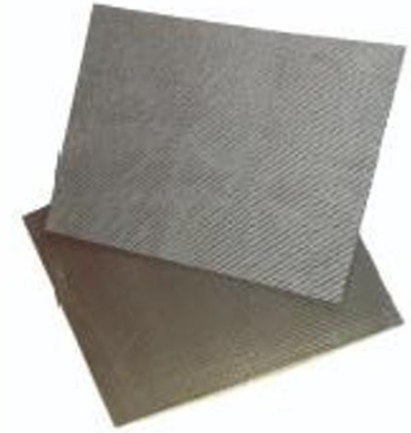

- Rolls in different thicknesses

Graphite Foil and Other Supportive Materials

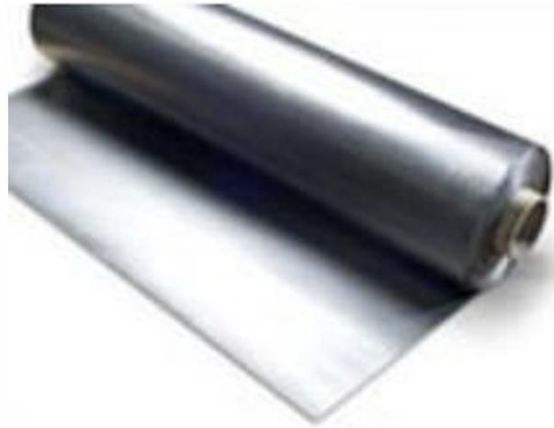

Graphite Foils:

- Graphite foils in forms of rolls and plates
- Different thicknesses and dimensions are available
- Needled plates or heat shields

Other Materials:

- Ceramic parts
- Molybdenum

Graphite Parts and Machined Items

Machined Items for HTA:

- Heating elements
- Carbon composite machined items
- Terminal connection parts
- Hot zone graphite items

Various Applications:

- Glass, EDM, Metallurgical, Jewellery etc. applications graphite parts.
